PROFESSIONAL PROFILE

Highly motivated Data Analyst currently pursuing a B.E. in Computer Science (AI & ML). Specialize in bridging the gap between traditional Business Intelligence (SQL, Power BI) and modern AI/ML solutions. Proven ability to transform complex datasets into clear, actionable business strategies with an emphasis on analytical rigor and creative problem-solving.

EDUCATION

Bachelor of Engineering (Computer Science & Engineering – AI & ML) *Rathinam Technical Campus, Coimbatore* | 2023 – 2027

- CGPA: 8.8

Higher Secondary Education *Fathima Girls Higher Secondary School, Gudalur, The Nilgiris*

- Percentage: 81%

TECHNICAL SKILLS

- Programming:** Python, Java
- Data Analysis:** SQL, Excel (Pivot Tables, Advanced Formulas), Power BI
- Machine Learning & AI:** Scikit-Learn, Prompt Engineering, Claude API
- Libraries:** Pandas, NumPy, Matplotlib, Seaborn
- Tools:** Jupyter Notebook, Git, GitHub, VS Code
- Languages:** English, Tamil, Hindi

INTERNSHIP EXPERIENCE

Data Analyst Intern | InternBoot

- Performed data cleaning and preprocessing utilizing Python (Pandas) and Excel, significantly reducing data inconsistencies.
- Conducted intensive Exploratory Data Analysis (EDA) to expose hidden business trends and operational patterns.
- Authored complex SQL queries for efficient data extraction and developed interactive Power BI dashboards for executive reporting, leading to stronger data-driven decision-making.

PROJECTS

HR Attrition Prediction Model | Python, Scikit-learn, Power BI

- Engineered a predictive machine learning model using Python and Scikit-learn, achieving an **85% accuracy rate**, improving prediction reliability and supporting better HR decision-making.
- Performed Exploratory Data Analysis (EDA) on the IBM HR Analytics dataset to uncover key factors influencing employee turnover.
- Designed an interactive Power BI dashboard allowing HR teams to simulate data-driven employee retention strategies.

Sales Data Analysis Dashboard | Pandas, Power BI, Excel

- Cleaned and preprocessed massive raw sales datasets using Pandas to handle missing values and anomalies effectively.
- Built an interactive Power BI Dashboard visualizing revenue growth, regional performance, and top-selling categories.
- Generated actionable insights that helped identify seasonal buying trends, leading to optimized inventory and marketing strategies.

AI Chatbot using LLM | Python, Claude API, Prompt Engineering

- Developed a functional AI chatbot for real-time query handling utilizing the Claude API.
- Implemented advanced prompt engineering techniques to ensure response relevance and prevent hallucinations.
- Engineered a scalable back-end workflow enabling dynamic user interaction, reducing average response time and improving overall user satisfaction.

CERTIFICATIONS

- Excel for Data Analysis** – Coursera
- Introduction to SQL** – DataCamp
- Relational Database Fundamentals** – MongoDB
- Design Thinking** – Coursera
- Complete Data Analyst Bootcamp (Basics to Advanced)** – Udemy
- Coding Essentials for Beginners** – Salesforce
